

3rd year –OCD-25-26

GOOD MORNING

DIAGNOSTIC SKILLS- CASE HISTORY RECORDING

Dr. Vanaja Reddy
Associate Professor
Oral medicine & Radiology

Lecture Learning Outcomes

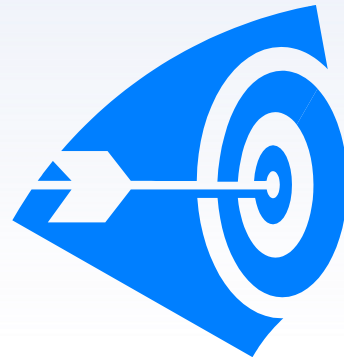

L7: Diagnostic Skills: Patient Case History Recording

CLO LLO. : By the end of this lecture, students should be able to:

- 2.1 L7.1 Enumerate the components of case history in the dental case sheet
- 3.1 L7.2 Explain the importance of taking case history for Dental Patients
- 2.1 L7.3 Analyse the data obtained from the different components of case history

SUCCESSFUL TREATMENT REQUIRES A PERFECT DIAGNOSIS....

A DIAGNOSTICIANS WORK IS NOT TO SEE THE RIPPLES ON THE SURFACE AND DECIDE THE NATURE OF THE SEA,BUT SHOULD EXPLORE THE DEPTH WHICH IS CALM AND SILENT BELOW ,HIDING ALL THE TREASURES.....

*FOR I SEEK THE TRUTH BY WHICH NO MAN
HAS EVER BEEN HARMED*

Diagnosis is a Greek word:

Dia - through.

Gnosis – knowledge.

***Oral Diagnosis is defined as
an art and science of identifying an oral disease
from its symptoms and signs.***

Symptoms: are the issues noticed by the patient and are shared by inquiry during their case history.

e.g. Pain, Swelling, Bleeding gums, Fever, Loose teeth

Signs: are visible changes noticed by the patient or examiner during an examination.

e.g. Tenderness, Swelling, Mobile teeth, Pocket formation

COMPONENTS OF CASE HISTORY

The Diagnostic Process : *a systematic collection of data leading to identification of disease*

I. Taking & Recording of Patient's History

II. Examination

III. Provisional Diagnosis

IV. Investigations

V. Final Diagnosis

I. Taking & Recording of Patient's History

Case History is a planned professional conversation between patient and dentist which

- Constitutes foundation for an intelligent approach to diagnosis
- Establish successful patient – dentist relationship

Methods of obtaining patients history

- A] INTERVIEW
- B] HEALTH QUESTIONNAIRE
- C] COMBINED

B.HEALTH QUESTIONNAIRE

- Fixed Set Of Health-Related Questions.

CLIENT HEALTH QUESTIONNAIRE

Name: _____ Date of Birth: _____

Date: _____

This brief questionnaire is about your health. It will assist us in determining your ability to participate in our program. This information is confidential.

Section 1

1. Do you have any serious health problems or illnesses (such as tuberculosis or active pneumonia) that may be contagious to others around you? If yes, please give details.

No ☐ Yes ☐ Date: _____ Details: _____

2. Have you ever had a stroke? If yes, please give details.

No ☐ Yes ☐ Date: _____ Details: _____

3. Have you ever had a head injury that resulted in a period of loss of consciousness? If yes, please give details.

No ☐ Yes ☐ Date: _____ Details: _____

4. Have you ever had any form of seizures, delirium tremens or convulsions? If yes, please give details.

No ☐ Yes ☐ Date: _____ Details: _____

5. Have you experienced or suffered any chest pains? If yes, please give details.

No ☐ Yes ☐ Date: _____ Details: _____

Section 2

6. Have you ever had a heart attack or any problem associated with the heart? If yes, please give details.

No ☐ Yes ☐ Date: _____ Details: _____

7. Do you take any medications for a heart condition? If yes, please give details.

No ☐ Yes ☐ Date: _____ Details: _____

8. Have you ever had blood clots in the legs or elsewhere that required medical attention? If yes, please give details.

No ☐ Yes ☐ Date: _____ Details: _____

9. Have you ever had high blood pressure or hypertension? If yes, please give details.

No ☐ Yes ☐ Date: _____ Details: _____

10. Do you have a history of cancer? If yes, please give details.

No ☐ Yes ☐ Date: _____ Details: _____

11. Do you have a history of any other illness that may require frequent medical attention? If yes, please give details.

No ☐ Yes ☐ Date: _____ Details: _____

I. Taking & Recording of Patient's History

Demographic data

Registration no and date

- Administrative purpose
 - Sorting of data
-
- Identification
 - Record Keeping Legal Documentation
 - Tracking Progress:
 - Billing and Insurance

I. Taking & Recording of Patient's History

Demographic data

Name :

- **Identification:** uniquely identify the patient and differentiate their records from others.
- **Personalized Care:** Addressing patients by name builds trust and establishes a good rapport.(psychological)
- **Accurate Record Keeping:**
- **Legal and Administrative Needs:** for legal documentation, billing, and insurance purposes

I. Taking & Recording of Patient's History

Age

- **Diagnosis and Treatment Planning:**

- Certain dental conditions, like early childhood caries, erupting teeth, or periodontal issues, are age-specific.
- helps in planning age-appropriate treatments, such as orthodontic braces for adolescents or dentures for older adults.

- **Understanding Growth and Development:**

- -for monitoring tooth eruption and jaw development.

- **Medication and Dosage:**

- helps determine safe and effective dosages for medications and anaesthesia.

I. Taking & Recording of Patient's History

Age

- Different age groups are prone to specific problems, like:
 - At birth – congenital cleft lip & palate
 - wisdom teeth complications in young adults or
 - tooth wear in older adults.
- **Legal and Consent Requirements:**
 - for obtaining appropriate consent (guardian consent for minors) .

I. Taking & Recording of Patient's History

Sex/Gender

- Girls: Iron deficiency anemia, Pubertal gingivitis,
- Females—smaller body weight—less dosage
 - Drug interactions- Hormonal changes
 - Pregnancy & lactation > prescription of drugs.
- Females —pregnancy gingivitis, Lichen planus, Auto-immune disorders
- Males— Hemophilia, oral cancer

I. Taking & Recording of Patient's History

Address-

- **Administrative purpose**
- **Communication & follow up appointments**
- **Epidemiological studies:** Endemic diseases/geographical prevalence:- fluorosis
- **Legal documentation**
- - Dental caries > in modern industrialized areas and
- Periodontal disease > in rural areas

I. Taking & Recording of Patient's History

Occupation-

-Occupational Hazards:- Industrial workers: Exposure to chemicals or dust , Gingival staining-lead, bismuth.

-Stress-Related Conditions: High-stress jobs - like bruxism (teeth grinding) or TMJ disorders.

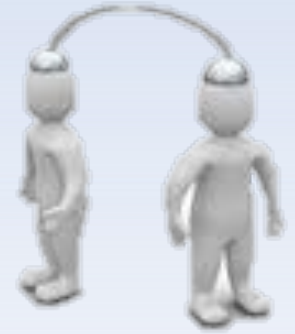

•**Certain jobs** may encourage habits like tobacco chewing, smoking, or nail-biting, tailors ,beauticians- notching of incisal edges.

-Time and Accessibility

-Socioeconomic Factors: -financial stability

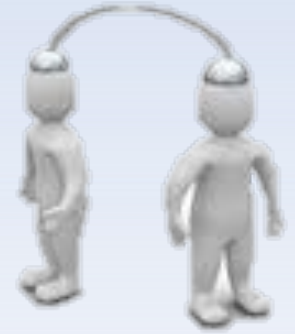

I. Taking & Recording of Patient's History

CHIEF COMPLAINT:

- Reflects the primary concern or problem for which the patient has approached the dentist
- Recorded in a Chronological order –
should be recorded in patients own words.
- If more than one complaint, record them in the order of severity.

I. Taking & Recording of Patient's History

CHIEF COMPLAINT:

- Complains of pain in left lower back tooth region for the past 3 days
- Complains of swelling on the right side of face/in mouth for the past 3 days
- Complains of stains on teeth and wants to get them cleaned
- Complains of loose teeth in lower front teeth
- Complains of bleeding gums and foul odor
- Complains of missing right lower back tooth and wants to get it replaced
- Complains of irregular placement of front teeth

I. Taking & Recording of Patient's History

History of present illness (HOPI)

- It is the record of narrative account of patient's problem from the onset to present time listing all the symptoms, signs, treatment undergone in a chronological order.
1. When did this problem start?
 2. What did you notice first?
 3. What makes problem worse or better?
 4. Have the symptoms become worse or better any time?
 5. Did you have any other problems or symptoms associated with this?
 6. Have you consulted any dentist or physician regarding the complaint?
 7. What have you done to treat these symptoms?

I. Taking & Recording of Patient's History

History of present illness

- PAIN:
- **Location-**
- **Origin & Mode of onset-** sudden/gradual
- **Cause of onset-** what precipitated the signs & symptoms
- **Duration** since how many days
- **Localization-** localized /diffuse/ referred/ radiating
- **Nature of pain-** burning /stabbing/ shooting/ sharp
- **Intensity-** mild/ moderate/ severe
- **Frequency-** Continuous / intermittent
- **Aggravating and relieving factors**
- **Associated symptoms**

➤ Pain

➤ Swelling

➤ Ulcer

- HOPI- - Example for Pain:
- The patient was apparently well 3 days ago, after which he began experiencing pain in the lower left back tooth. The pain is described as gradual, sharp, and lingering, with moderate intensity. It is intermittent, increasing/aggravates when lying down or chewing food, and radiates to the left ear and temple region. The pain is relieved by medication (painkillers), which he has been taking for the past 3 days, obtained from the pharmacy.

I. Taking & Recording of Patient's History

Past Dental History

- Evaluate the patient's current dental status and how the patient will respond to the proposed treatment.
- - Frequency of visits to dentist.
 - Past experience during and after local anesthesia, after extraction.
 - Past Periodontal therapy, past orthodontic treatment, Dental appliance history or Root canal fillings.
 - Any surgical procedures besides extraction.

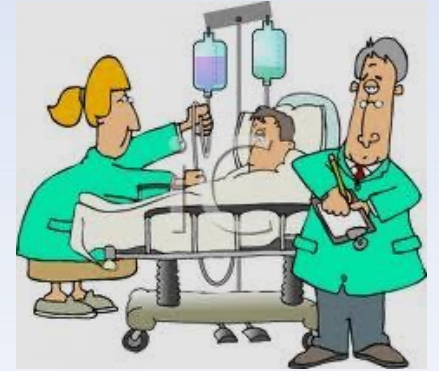

- **Example:** Patient gives history of getting filling done in left lower back tooth 1 year ago , and has got fractured 2 months ago.
- Patients gives history of tooth extraction in right posterior region 2 weeks ago which was atraumatic

(do not use tooth numbers here)

I. Taking & Recording of Patient's History

Past Medical History

• Assess in diagnosis of oral disease—there are many systemic problems which have oral manifestation.

- **Serious illnesses**
- **Hospitalizations**
- **Allergies/Immunizations**
- **Medications**
- **Transfusions**
- **Pregnancy**
- **Accidents/Injuries**

- 1. Cardiovascular
- 2. Respiratory System
- 3. Central Nervous System
- 4. Gastrointestinal System
- 5. Genitourinary System
- 6. Musculoskeletal System
- 7. Endocrine System

- Common Cardiovascular Diseases

- A] Hypertension & Hypotension
- B] Myocardial Infarction
- C] Angina Pectoris
- D] Congestive Heart Failure
- E] Congenital Cardiac Diseases

- Common CNS Disorders

- A] Cerebral Stroke
- B] Parkinson's Disease
- C] Alzheimer's Disease
- D] Epilepsy

- Common Respiratory Diseases

- A] Asthma
- B] Allergic Bronchitis
- C] Pulmonary Tuberculosis
- D] Chronic Obstructive Pulmonary Disease

- EXAMPLE: The patient reports no history of any known underlying diseases to date.
- The patient is known diabetic for the past 8 years and is currently on medication.
- patient has a history of cardiac disease and is on anticoagulants.
- The patient is pregnant, currently in the second trimester.

I. Taking & Recording of Patient's History

Family history:

1. Inherited & Familial diseases

2. Marital status

Hereditary diseases :

eg: Hemophilia , Diabetes mellitus , Hypertension

Example: No known medical history in immediate family members

Social History :

Occupation, financial status, education & type of personality, social support

I. Taking & Recording of Patient's History

Personal History :

- **Diet: Vegetarian/mixed**
- **Appetite: Normal /abnormal**
- **Sleep: Regular/irregular**
- **Menstrual history: Regular/irregular**
- **Married/unmarried:**
- **Pregnancy:**
- **H/O Psychogenic stress: yes/no**

I. Taking & Recording of Patient's History

2. Oral hygiene habits: Teeth cleaning, technique : toothbrush / finger / tooth paste / tooth powder /charcoal / salt / roasted tobacco.

(Patient cleans her teeth using tooth brush and tooth paste once a day in both circular and horizontal direction since childhood)

3. Tissue abuse habits: smoking/chewing Tobacco- type / frequency/ duration /

4. Parafunctional Habits:

- Bruxism : teeth grinding / clenching
- Tongue thrusting
- Mouth breathing
- Nail / cheek / lip / pencil biting
- Bobby-pin opening.

History Of Present Illness –swelling/ growth

Chronologic Account Of Chief Complaint:

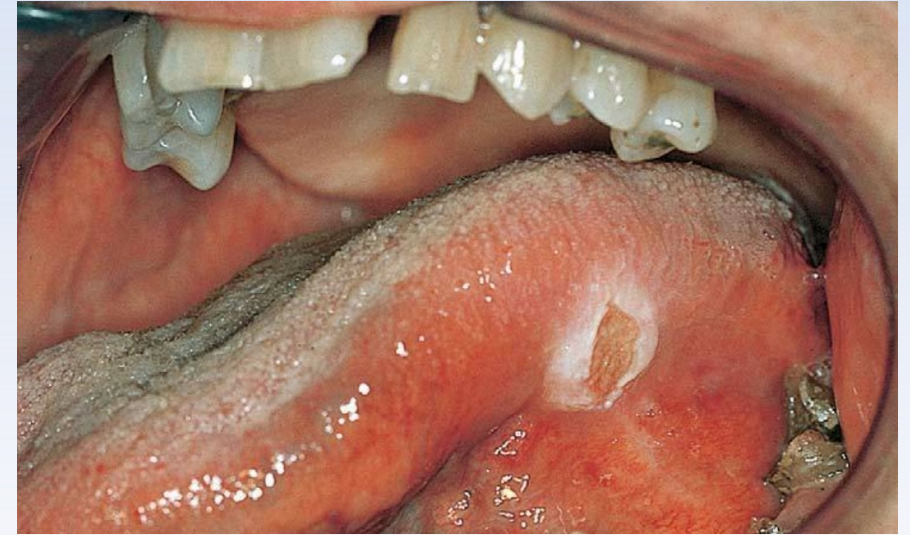

- **Location-**
- **Origin & Mode Of Onset-** Sudden/Gradual
- **Cause Of Onset-** What Precipitated The Signs & Symptoms
- **Duration:** Since How Many Days
- **Localization-** Localized /Diffuse/ Referred/ Radiating
- **Nature Of Pain-** Burning /Stabbing/ Shooting/ Sharp
- **Intensity-** Mild/ Moderate/ Severe
- **Frequency-** Continuous / Intermittent
- **Aggravating And Relieving Factors**
- **Associated Symptoms**

HOPI- ULCER

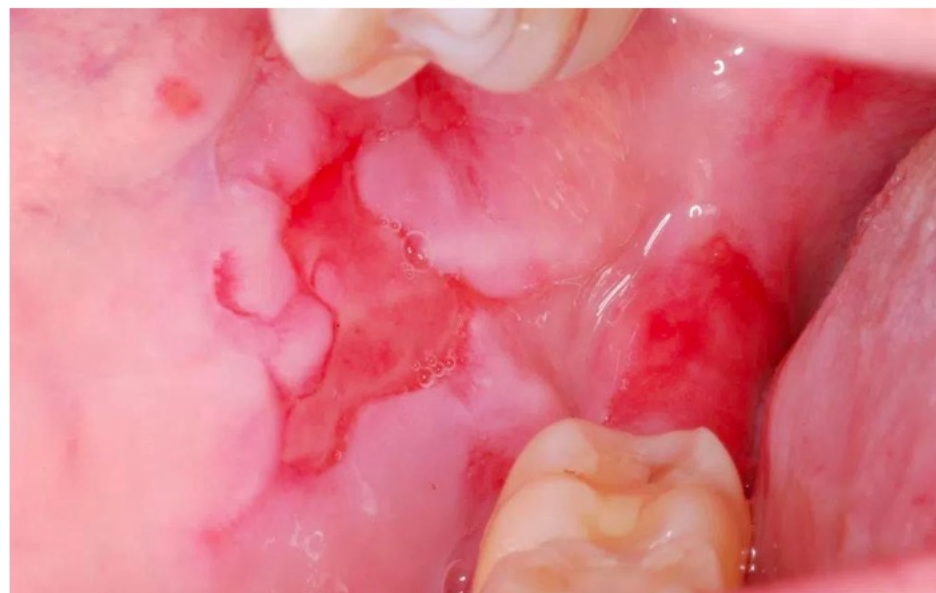

- LOCATION
- DURATION
- MODE OF ONSET
- PAIN
- DISCHARGE
- RECURRENT??
- ANY OTHER ASSOCIATED SYMPTOM

HISTORY

- Prodromal period
- Preceded by vesicle/bullae
- H/O trauma
- Occur periodically or first time
- Pain
- Duration
