

PRACTICAL: ORAL CAVITY IN HEALTH

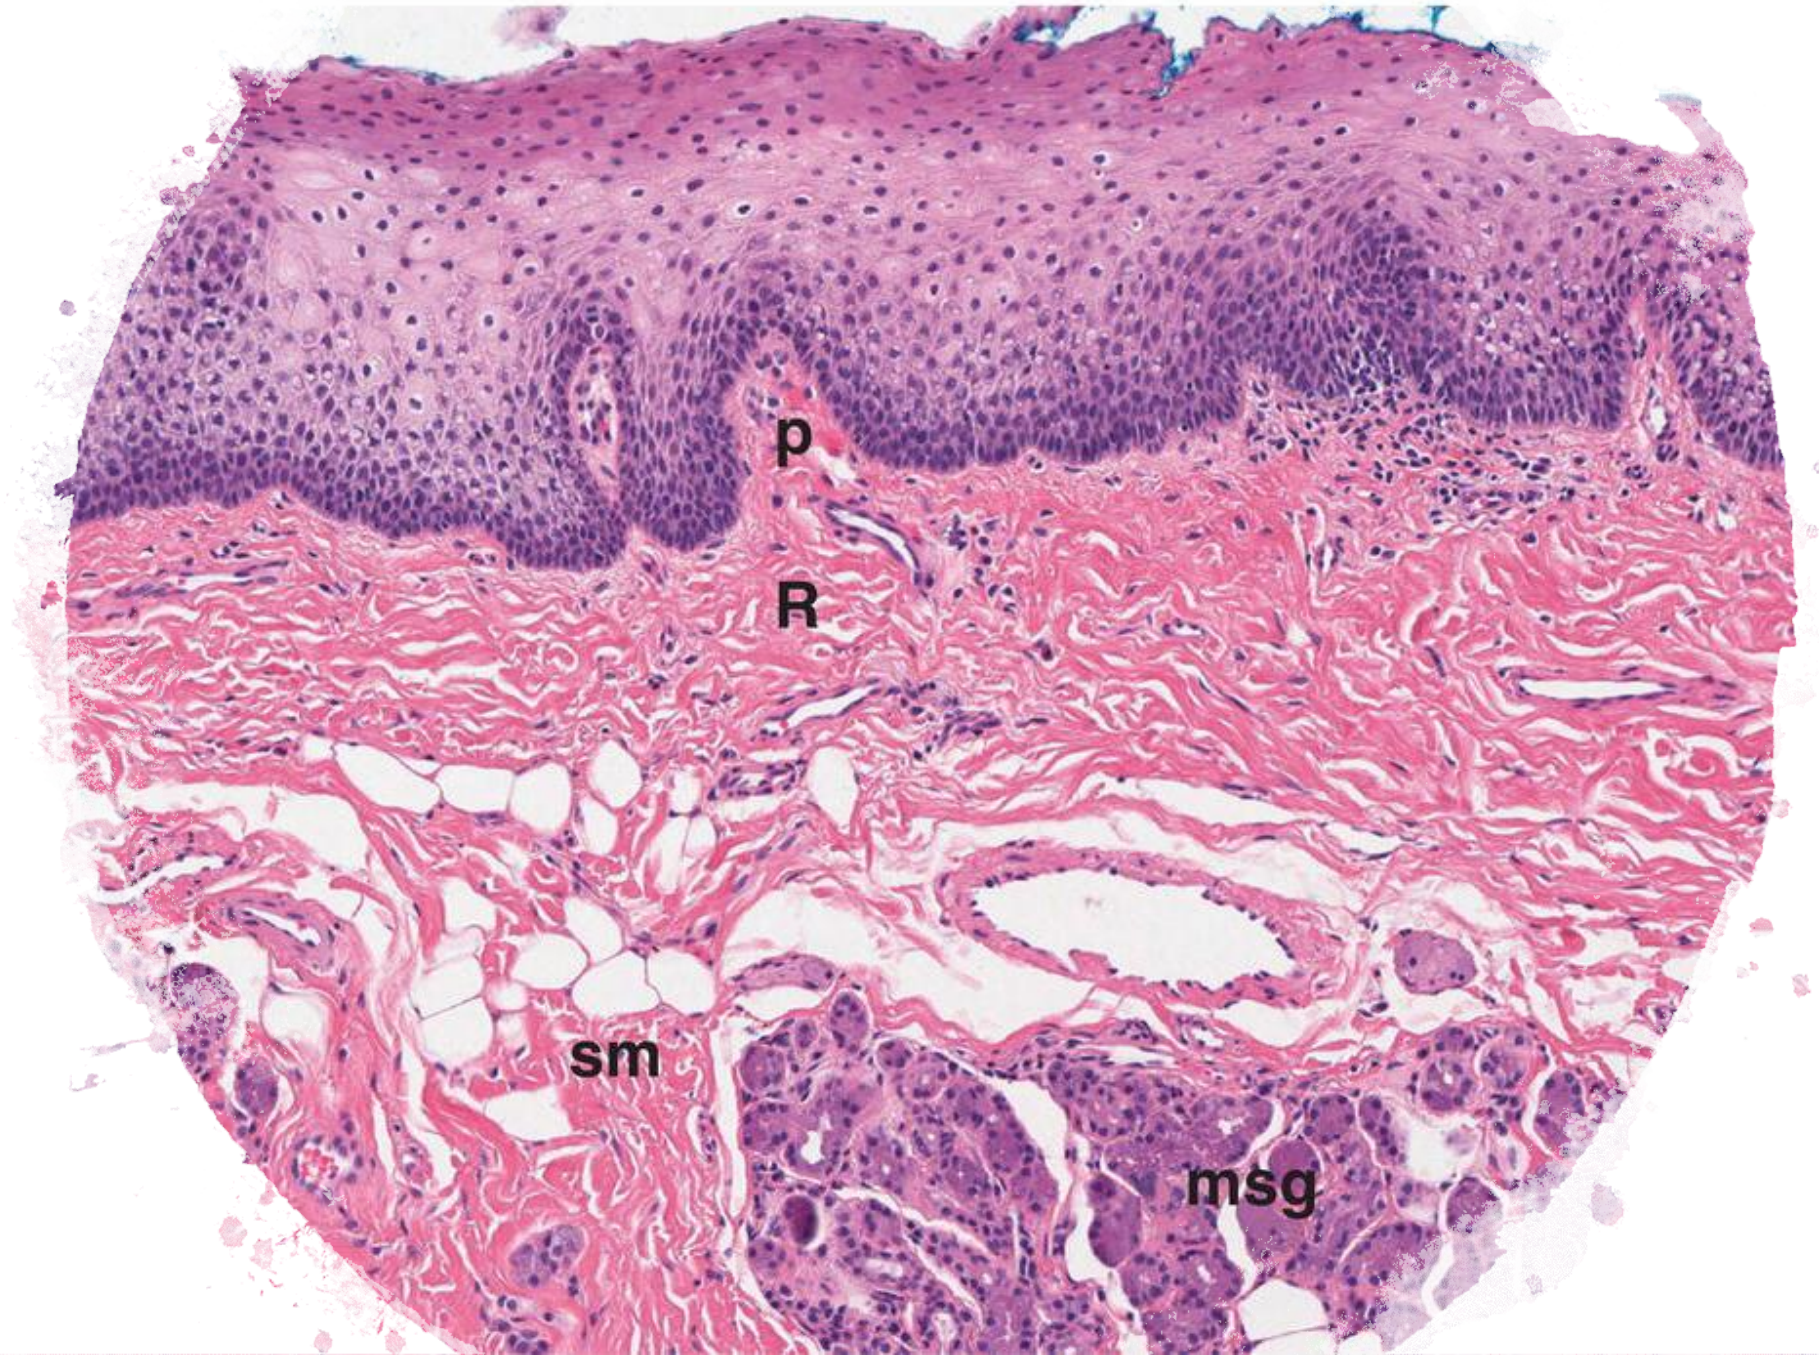

SLIDE DISCUSSION
HARD PALATE AND
GINGIVA

DR SAJDA GAJDHAR

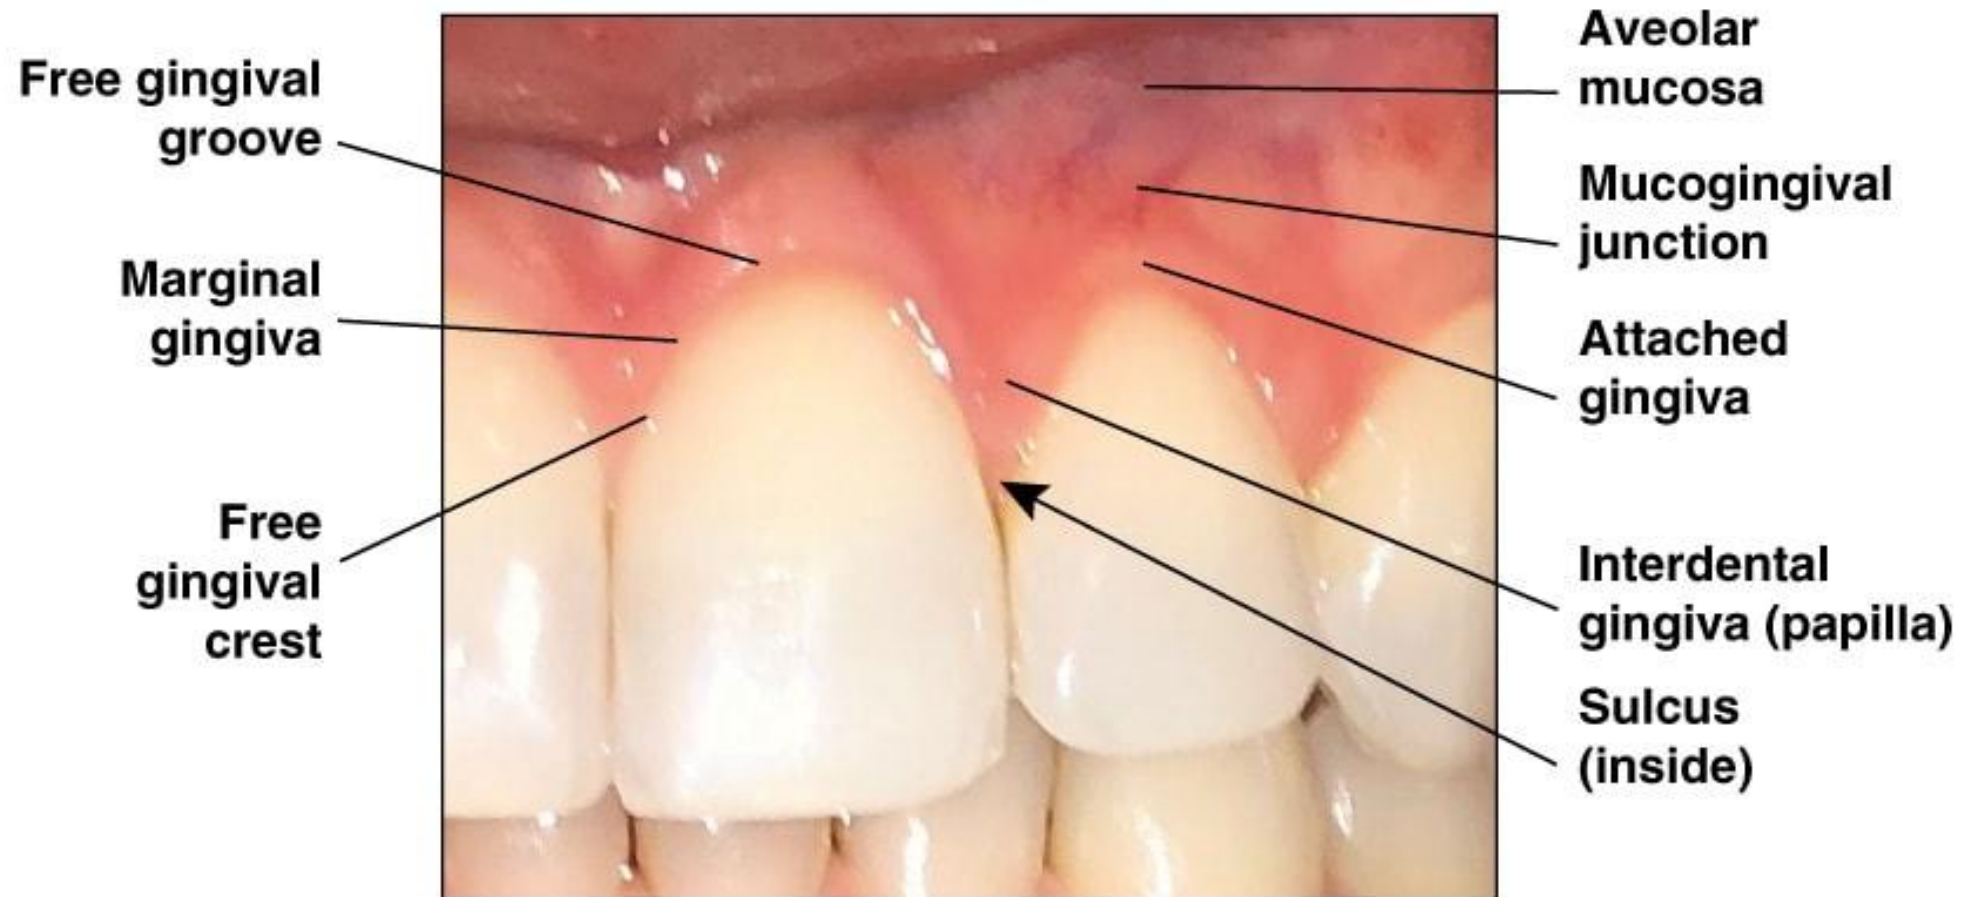

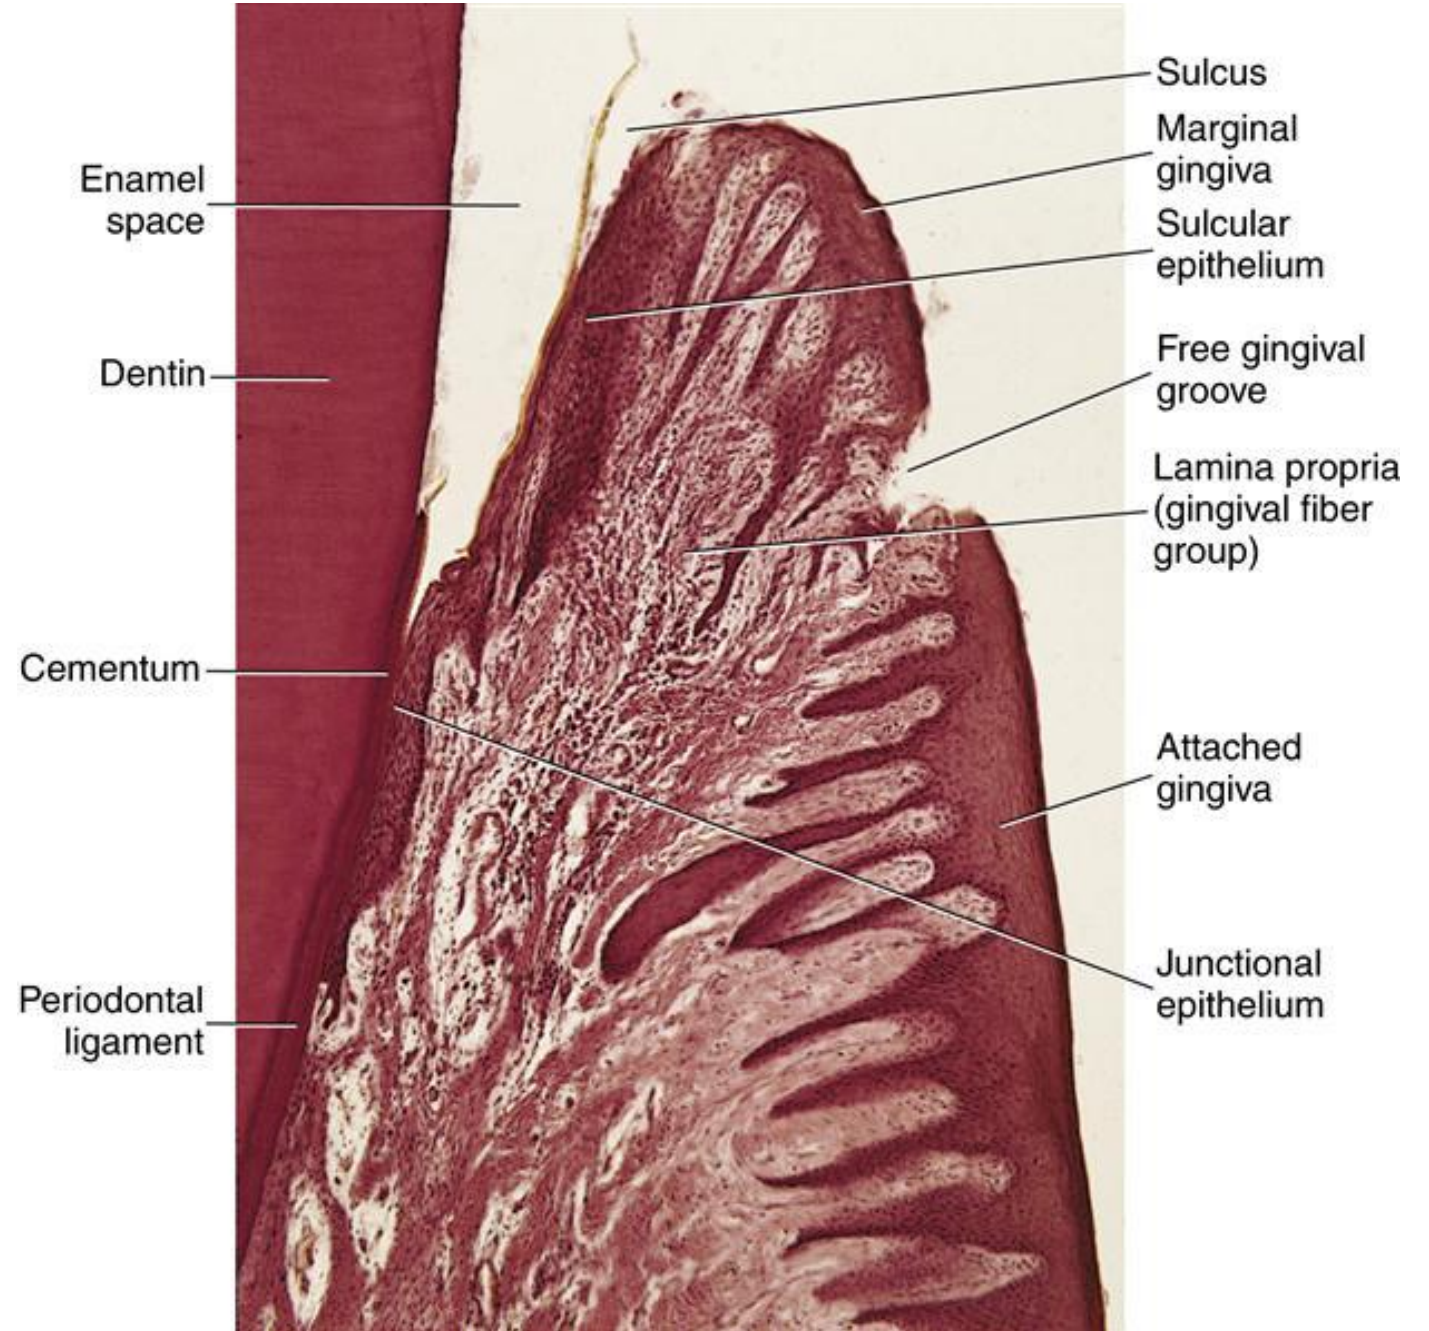

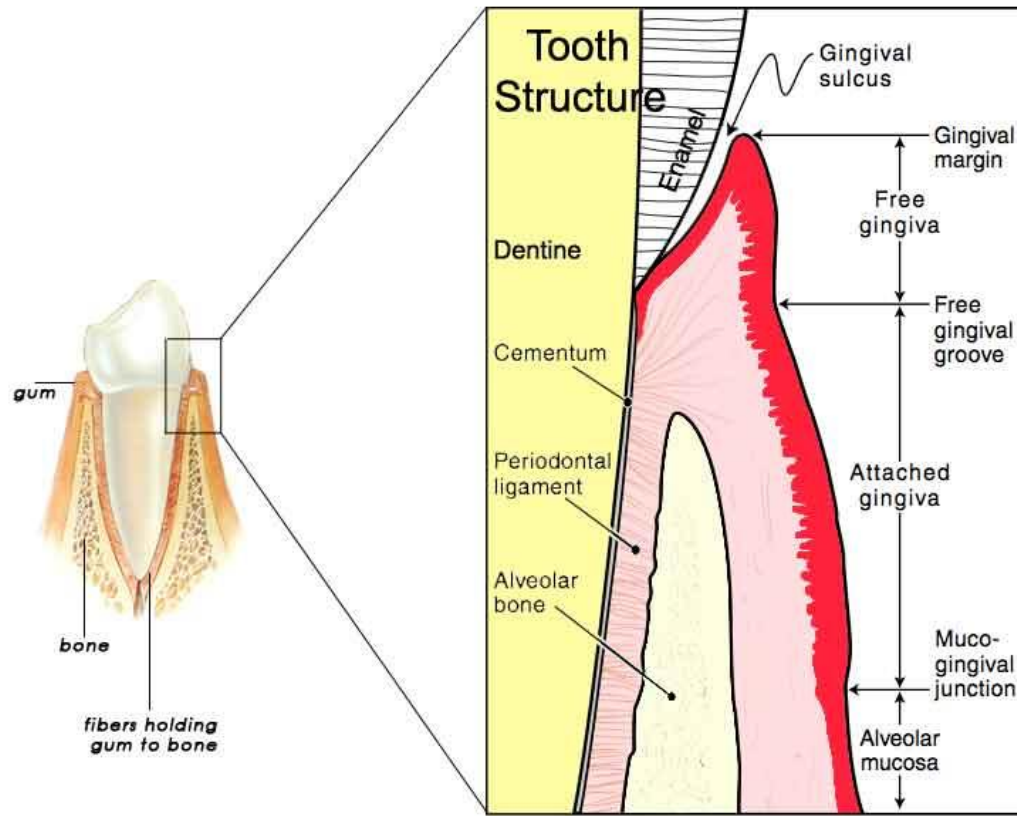

Basic histology

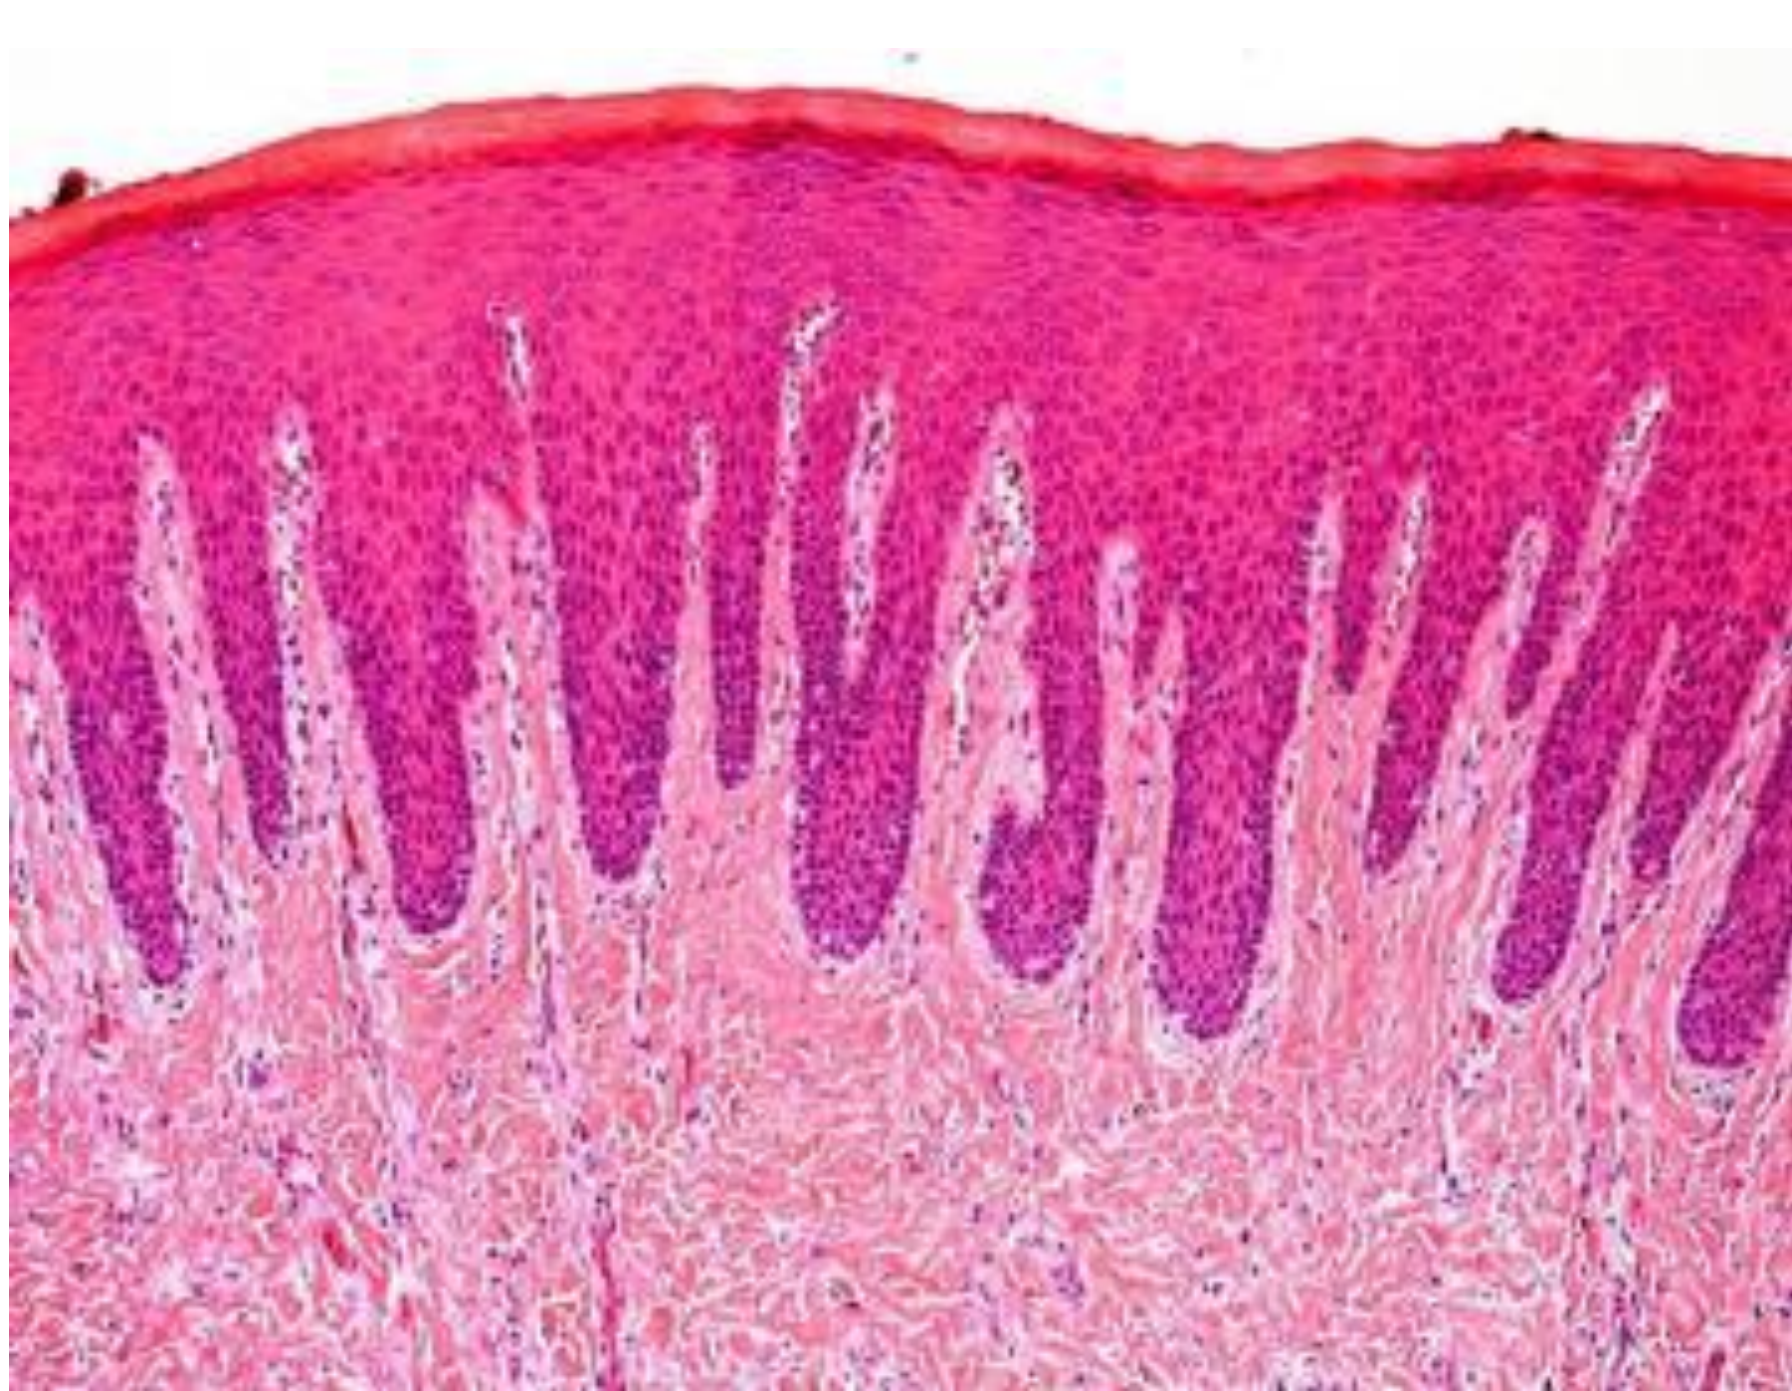

YOU MUST KNOW...

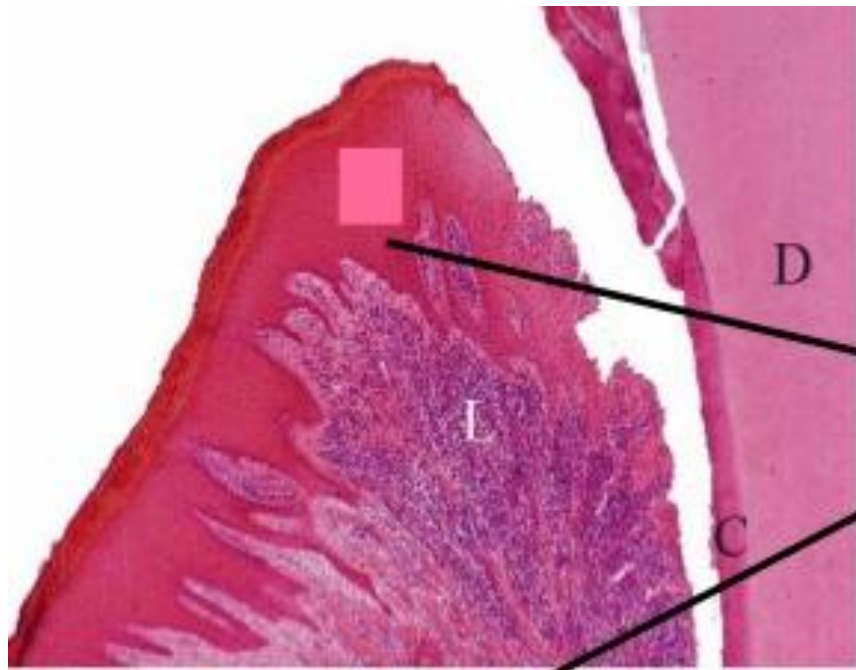

GINGIVA

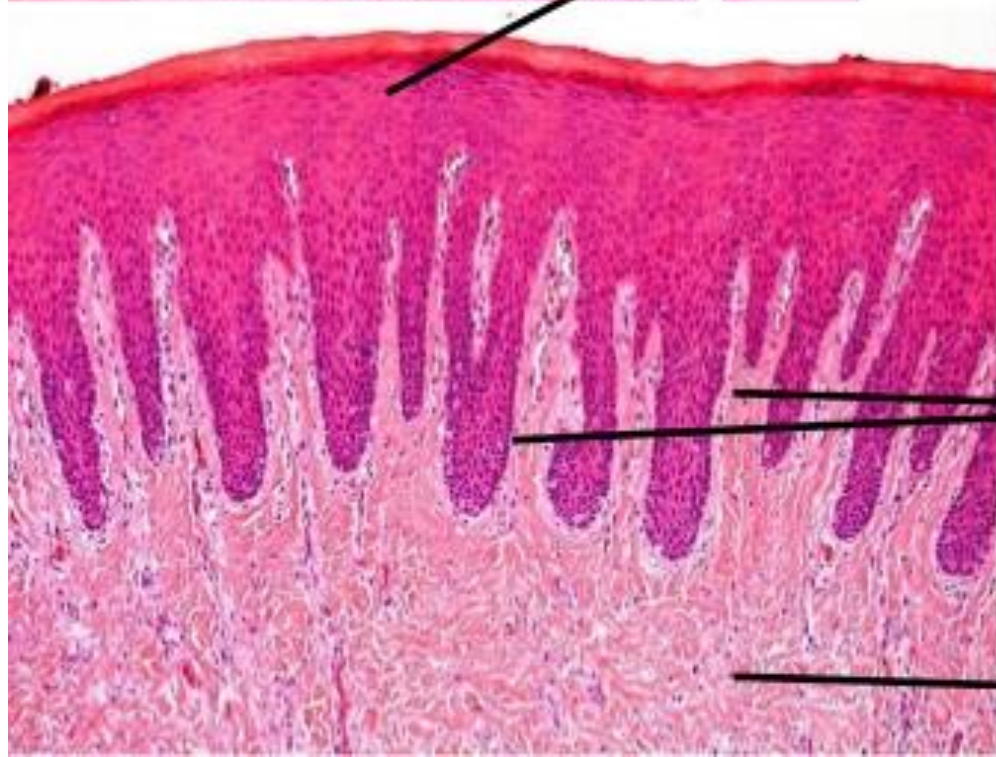

HISTOLOGY OF GINGIVA

A-
ORTHOKERATINISED
EPITHELIUM

B- THIN, LONG
RETEPEGS

C- CONNECTIVE
TISSUE

Histology of gingiva

1. **Epithelium** : **Keratinized stratified squamous epithelium(parakeratinized)** with long and sharp rete ridges
2. **Lamina Propria** : **dense bundles of collagen fibres**
3. **Submucosa** : **absent**
